DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: on page 5, second to the last line, it appears that "28 and 41" should be – 23 and 36 --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by each of lida or Chan et al. See Figure 1 of lida and Figure 3 of Chan. Concerning the discussion of the EP 1,213,230 (aka lda), the terms "top", "bottom", "below", "right", etc. are relative terms that do not precisely define a product since they depend on the position from which one views the product.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/823,268 Page 3

Art Unit: 1772

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over lida or Chan each in view of Nissen et al. The primary references disclose the invention substantially as claimed; see Figure 1 of lida and Figure 3 of Chan. However, they do not disclose the use of a starter tab on the stack of folded sheets. The secondary reference discloses folding the top panel of a stack of folded sheets to produce a starter tab; see the Abstract, column 1, lines 29-35 and Figure 11. It would have been obvious to one of ordinary skill in the art to fold the top panel of the stacks of folded sheets in the references' articles to produce a starter tab which allows convenient access to the folded sheets.

Allowable Subject Matter

6. Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.

Art Unit: 1772

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
